

Eduardo García Sanz

Frontend Developer

eduardo@comakai.com | +34 617 654 092

This is a small summary of my recent professional life, I hope to reflect all the passion and enthusiasm I dedicate to the exciting world of frontend development. However, you are welcome to find more about my work life, concerns, technical knowledge or even level of English on my [LinkedIn](#) and [StackOverflow](#) profiles.

Frontend Leader @ Playtomic

June 2017 - currently

Design and implement a web architecture based on React and Redux capable of being rendered on the server side to ease SEO. The UI components are fully reusable thanks to their decoupling from the business logic implemented with sagas and reducers.

Implement features from user stories (Scrum). Address issues and keep a decent code coverage of critical parts through unit testing.

Interview, select and train frontend newcomers.

react redux sagas node koa docker scrum jest i18n bem

Frontend Architect @ ING España

January 2017 - June 2017

Create and test PoC's about React Native as a fast alternative to iOS and Android development, as well as covering its integration within existing applications and the possibility of interaction with Polymer based apps.

react react-native redux android ios polymer

Fullstack Developer @ Sincrolab

March 2016 - January 2017

Develop an SPA and a restful API for the administration of patients by their therapists, with the possibility of configuring their cognitive profiles. Implement a deployment system based on Dokku to ease deployments.

react redux koa dokku java postgresql unity android ios

Teacher @ Fictizia

2015 - 2017

Teach AngularJS and frontend development in general both at the academy and in company ([Phone House](#), [Rumbo](#)).

angular js html css
